Sn	Head	Description
1	Subject	Essay Writing Competition for All Students of Architecture,
2	Topic	Architectural Design Forms - Missing Sense of Design Elements to Unleash the Futuristic Role to Bridge the Broken Hearts, Homes and Boundaries within and in Between Nations.
3	Who conducts:	Brindavan College of Architecture ( BCOA ) , Bangalore,Karnataka State, India.
4	About BCOA	<p>BCOA is a new College Established in 2016 with a main aim to promote Education- Research-Industry Interaction in the field of Architecture &amp; Urban Planning. AT BCOA Architecture is a way life. We see Architecture is not alone while understanding human behavior; we link Architecture with Sociology, Phycology, Philosophy, Medical Science,and Science of Philosophy. we promote our Architectural student with way of life habits with 8 creative centers , which shape their individual Characters and personalities in establishing link between Architecture and Society way living, thus we call Architecture + ism, a way of Life.</p> <p>We promote and fund research on the topics that unites the Human Society through Architectural designs by transforming great ideas from Sociology, Phycology, Philosophy, Medical Science, Science of Philosophy .Proposals are accepted through the year from Professionals, Research Scholars from around the Globe.</p>
5	Introduction to Essay Topic:	<p>Architecture, an intrinsic Nature of Spices to build their own protective habitable spaces in the eco-system of Nature. It may be an ant, a Snake, a Bird and Human Beings. As per Science, Big Bang which created this Creation followed by this Universe and then a beautiful Planet Earth , which passed through millions of years in the cycle of Evolution i,e from Primitive life form spices to Primitive man of stone age to the present man of software age and what future holds in this evolution.</p> <p>Fundamental question is ? Who holds and moulds human nature? Is it environment? and then other question arises who holds and moulds Environment ? Are these two separate? Or are both the same? Or to say both enrich each other or both can destroy each other. Who is bigger boss? Is nature or man? Obviously Nature in its physical manifestation, where man is a tiny element in this Nature. So there is no question of comparison to understand who is bigger? It is a Natural process and humans are product of this natural process. Scientifically Human Beings are consists of 10 chemical elements in Semi-Liquid state with inbuilt force that comes with birth and diminishes with death. Scientifically it is understood that the nature/ environment that is around in the form of images, patterns, sounds that makes the human body feeling system to register actions as perception and show those perceptions as further actions through various body parts in daily life.</p> <p>Do Architectural design which makes built environment has any role to play in moulding people’s behavior patterns in various places like home, school, office, play areas and in overall general civic and public spaces in the present modern age ? . If we see the World today, the society is facing lots of serious human personal level problems like stress, strain depression...etc and environmental pollution impacted diseases and associated problems. Due to this</p>

, Civic institutions are not able to cope up with the pressure to handle human problems from Democracy to Entertainment. Do architecture dividing the people, communities and societies and solidifying human mindsets rather than serving to Human natural minds way of living Can a home form show the equality of opposite forms energy, where any negative action by house member equally reflects reaction force by others and at the end both energy forms goes into annihilation cycle of recycling. Can a house design show the Origin point of human body and from cradle to crematorium making one's to know the value of Human Life. Who is breaking the homes ? World is witnessing at present 65.0 Millions as Refugees, who lost their homes and lodged in Refugee camps all over the World.. How come a man who born in a home, grown up and destroys his own home and other homes.

Sociologist says, it is the collective irresponsible behavior and glorification of imagined negative human qualities in human day to day life, which is the root cause and mother of all problems. Habitable space, a house is the living space where everyone performs activities like learn, work, and play. Why house form / design / interior design not able to influence what is good behavior to its inhabitants? Why there is so much domestic violence right under the most of the houses? Why Democratic institutions like Parliament do not serve its fullest purpose? Is there anything wrong in its building form / design, where it is not able to influence people's representative's collective responsibility to do good to society?

Why there are campus violence and shoot outs?, Why Student Suicides are happening ? are they not enjoying their own existence in their home ? Is there anything wrong in school building form / design, where it is not able to connect users i.e. students to their education being learned. Why Architectural design not able to directly reflect in its building forms not through any assigned abstract forms but more directly as described in human behavioral subjects like Sociology, Psychology, Philosophy, Medical Science, Biology, Science of Philosophy where the human positive qualities are described so that users will be able to connect to positivity at different building spaces.

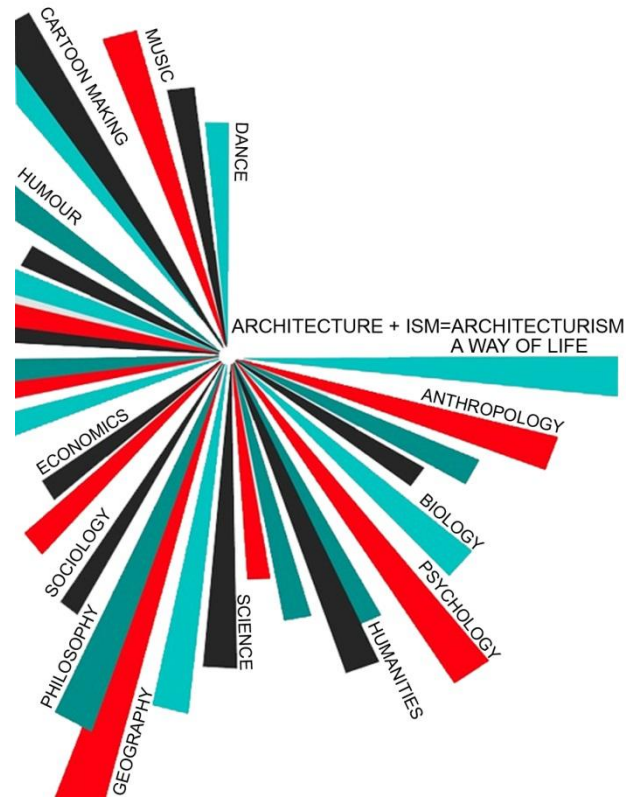

Why people go for violent behavior during public protest? Are our public spaces devoid of required symbolism showing public integration and unity? Can an architectural design / form connect users to their origins at various public / Civic spaces ? Can public spaces inspire people to give respect to even a garbage Bin as Hon.ble Garbage Bin Form and make them understand that its material elements are permanent beings in the creation.

Why not a Police Station building form/ design to be a deterrent to crime ? is there anything wrong in the Police station buildings form / design that crimes happen near by or right close to Police station buildings ? Why majority of Prisoners are not able to get reformed in Prisons? Can a Prison space connect users i.e Inmates to their Origins . Is there something wrong in Prison building form / design, where spaces and users are not connected with each other?.

The above problems are not today's problems; these are coming from centuries and only scale matters now. Why architectural design creativity is not able to provide solutions at the very basic habitable space i.e. at right in "Home " . It means ,can architectural design create a human wisdom and expansion of human perception right in the middle of home ?. Can Architectural design of a home inspire the members to give equal respect for Living and non-living things ?. Can a Home design inspire to tag a garbage bin as Hon.ble Garbage Bin Form.

		<p>Can we afford to continue with the same Architectural design sense or is there any missing sense of design dimensions to unleash the futuristic role to Bridge the Broken hearts and broken Boundaries within Nation and in between Nations. is there any wisdom architecture ? , where one gets wisdom and ultimately lead to wellness &amp; bliss right under the roof of home without going or visiting any other places?.</p> <p>As there are human behavioral knowledge spheres with Sociology, Psychology, Philosophy, Medical Science, Biology, Science of Philosophy , the question comes , is architecture taking adequate key points from these subjects ? and able to give them a physical shapes to inspire users behavior towards positivity at various building spaces. If not, then what is architecture design ? is it only technology ? or does it establishes connection / concerned about users behavior patterns at those spaces ? is it working in its own isolation ? How do you make this connection between architecture and other knowledge domains associated with human behavior more practical and implementable in physical forms ?</p> <p>Do you suggest an open dialogue between Architects and other experts of other disciplines to brain storm over Building projects that are concerned to all people?. Can Architecture Unleash the Unknown and link the user to his/her unbiased inner core perception at a given space to experience higher state of existence.</p> <p>Take a pen sketch an easy on the futuristic role of Architectural design in solving the above age old problems.</p> <p style="text-align: center;"><b>To Quote Frank Lloyd Wright ( 1867-1959)</b>  <b>“ I believe in GOD but I spell it Nature. Nature is my manifestation of GOD. I go to Nature every day for Inspiration in the day’s work. I follow in buildings the Principles which Nature has used in its domain.”.</b></p>
6	How much to write ?	<p>A 2000-3000 words maximum + Sketches as many as to write offline and upload into web site of <a href="http://www.brindavancollegeofarchitecture.com">www.brindavancollegeofarchitecture.com</a> with your details.</p> <p>The writeup and sketches should cover the following under separate Headings:  what will be the future forms of Homes , Learning Institutions, Working Institutions, Governance Institutions, Recreational Institutions and Correctional Institutions ( Prisons ).</p>
7	Judgement Criteria	<p>Essays will be judged on the basis of Original ideas, Uniqueness, and practicability and should be able to inspire common masses in the society.</p>
8	Prize:	<p>1st Prize:3,000,( Three thousand ) 2ns Prize: 2,000 ( Two Thousand ) ,  3<sup>rd</sup> Prize:1,000/- ( One Thousand)</p>
9	Terms & Conditions	<ol style="list-style-type: none"> <li>1) To be submitted in pdf.</li> <li>2) Essays must be submitted in English</li> </ol>

		<p>3) Essay must not have been previously published and must not have been awarded any National or International prize.</p> <p>4) All 3 Winners will be given free registration to attend an International Workshop being conducted in the month of July,2017. By BCOA.</p> <p>5) Non Indians also can send their Essay but prizes will be given as per conversation of Indian currency in Dollars.</p> <p>6) Any queries, write to email: <a href="mailto:brindavanarch.ka40@gmail.com">brindavanarch.ka40@gmail.com</a></p>
10	Where to send	Open web site <a href="http://www.brindavacollegeofarchitecture.com">www.brindavacollegeofarchitecture.com</a>
11	Last date for Submission of Essay:	1 <sup>st</sup> May,2017 , mid night before 11.59 pm by email.
12	Other Competitions&Programmescomingup:	<p>1) Global Students Architectural Design Essay Competition.</p> <p>2) Global Student Design Competition for “ Smart Public Square “ for a city. Know more details at <a href="http://www.brindavancollegeofarchitecture.com">www.brindavancollegeofarchitecture.com</a>.</p> <p>3) 2 day 16-17th ,June,2017 ,International Conference on “Architectural Design/ Forms and its relationship with human behavioral subjects of Sociology, Psychology, Philosophy, Medical Science, Biology and Science of Philosophy – as an input to Architecture +iSM- A way of Life.”</p>
