Sn	Head	Description
1	Subject	Design Competition for Global Architectural Students.
2	Project:	<p>Design a “ Smart Public Square for a City “.which goes beyond Architectural design to integrate other fields of human behavioralknowledge domains of Sociology, Psychology, Philosophy, Medical Science, Biology and Science of Philosophy to bring out Architectural Design Formsto Unleash the Futuristic Role to Bridge the Broken Hearts, Homes and Boundaries within and in Between Nations with this “ Smart Public Square “, a Planet landmark in any City on Earth, which reflects the “ Peoples Path “.</p> <p style="text-align: center;">“We shape our buildings. Thereafter, they shape us.” WINSTON CHURCHILL.</p>
3	Who conducts:	Brindavan College of Architecture (BCOA) , Bangalore,Karnataka State, India.
4	About BCOA	<p>BCOA is a new College Established in 2016 with a main aim to promote Education- Research-Industry Interaction in the field of Architecture & Urban Planning. AT BCOA Architecture is a way life. We see Architecture is not alone while understanding human behavior; we link Architecture with Sociology, Psycology, Philosophy, Medical Science,Biology and Science of Philosophy. we promote Architectural students with The way of life habits with 8 creative centers of Excellence inhouse , which shape their individual Characters and Personalities in establishing link between Architecture and Society by way of living, thus we call Architecture + ism, The way of Life for an Architect.</p> <p>We promote and fund research on the topics that unites the Human Society through Architectural designs by transforming great ideas from Sociology, Psycology, Philosophy, Medical Science,Biology and Science of Philosophy .Proposals are accepted throughout the year from Professionals, Research Scholars around the Globe.</p>
5	Introduction to Design Competition.	<p>Architecture, an intrinsic Nature of Spices to build their own protective habitable spaces in the eco-system of Nature. It may be an ant, a Snake, a Bird and Human Beings. As per Science, Big Bang which created this Creation followed by this Universe and then a beautiful Planet Earth , which passed through millions of years in the cycle of Evolution i,e from Primitive life form spices to Primitive man of stone age to the present man of software age and what future holds in this evolution.</p> <p>Fundamental question is ? Who holds and moulds human nature? Is it environment? and then other question arises who holds and moulds Environment ? Are these two separate? Or are both the same? Or to say both enrich each other or both can destroy each other. Who is bigger boss? Is nature or man? Obviously Nature in its physical manifestation, where man is a tiny element in this</p>

Nature. So there is no question of comparison to understand who is bigger? It is a Natural process and humans are product of this natural process. Scientifically Human Beings are consists of 10 chemical elements in Semi-Liquid state with inbuilt force that comes with birth and diminishes with death. Scientifically it is understood that the Nature/ Environment that is around in the form of images, patterns, sounds that makes the human body feeling system to register actions as perception and show those perceptions as further actions through various body parts in daily life.

Do Architectural design which makes built environment has any role to play in moulding people's behavior patterns in various places like home, school, office, play areas and in overall general civic and public spaces in the present modern age ? . If we see the World today, the society is facing lots of serious human personal level problems like stress, strain depression...etc and environmental pollution impacted diseases and associated problems. Due to this , Civic institutions are not able to cope up with the pressure to handle human problems from Democracy to Entertainment. Do architecture dividing the people, communities and societies and solidifying human mindsets rather than serving to Human natural minds which is a way of living . Can a home design form show the equality of opposite forms energy, where any negative action by house member equally reflects reaction force by others and at the end both energy forms goes into annihilation cycle of recycling. Can a house design show the Origin point of human body and from cradle to crematorium making one's to know the value of Human Life. Who is breaking the homes ? World is witnessing at present 65.0 Millionsas Refugees, who lost their homes and lodged in Refugee camps all over the World. How come a man who is born in a home, grown up and destroys his own home and other homes. These problems are not political fallouts, but holds responsibility on human behavioral problemsbeginning from home to public spaces by the people . The users of home spaces and public spaces, those spaces are not able to connect users to the People's inner core unbiased perception, hence there is a behavioral problem of users at these spaces.

Sociologist says, it is the collective irresponsible behavior and glorification of imagined negative human qualities in human day to day life, which is the root cause and mother of all problems. Habitable space, a house is the living space where everyone performs activities like learn, work, and play. Why house form / design / interior design not able to influence what is good behavior to its inhabitants? Why there is so much domestic violence right under the most of the houses? Why Democratic institutions like Parliament do not serve its fullest purpose? Is there anything wrong in its building form / design, where it is not able to influence people's representative's collective responsibility to do good to society?

Why there are campus violence and shoot-outs?, Why Student Suicides are happening ? are they not enjoying their own existence beginning from their home ? Is there anything wrong in school building form / design, where it is not able to connect users i.e. students to their education being learned. Why Architectural design not able to directly influence in its building forms , but not through any assigned abstract forms but more directly as described in human behavioral subjects like Sociology, Psychology, Philosophy, Medical Science, Biology, Science of Philosophy where the human positive qualities are described so that users will be able to connect to positivity at different building spaces.

Why not a Police Station building form/ design to be a deterrent to crime ? is there anything wrong in the Police station buildings form / design that crimes happen near by or right close to Police station buildings ?. Why majority of Prisoners are not able to get reformed in Prisons? Can a Prison space connect users i.e Inmates to their Origins ?. Is there something wrong in Prison building form / design, where spaces are not able to connected with users ?.

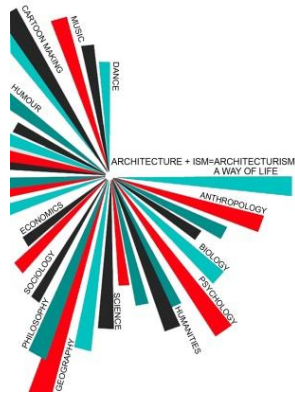

Can we afford to continue with the same Architectural design sense or is there any missing sense of design dimensions to unleash the futuristic role to Bridge the Broken hearts and broken Boundaries within Nation and in between Nations. is there any wisdom architecture ? , where one gets wisdom and ultimately lead to wellness & bliss right under the roof of home without going or visiting any other places?.

As there are human behavioral knowledge spheres with Sociology, Psychology, Philosophy, Medical Science, Biology, Science of Philosophy , the question comes , is architecture taking adequate key points from these subjects ? and able to give them a physical shapes to inspire users behavior towards positivity at various building spaces. If not, then what is architecture design ? is it only technology ? or does it establishes connection / concerned about users behavior patterns at those spaces ? is it working in its own isolation ? How do you make this connection between architecture and other knowledge domains associated with human behavior more practical and implementable in physical forms ?

Why people go for violent behavior during public protest? Are our public spaces devoid of required symbolism showing public integration and unity? Can an architectural design / form connect users to their origins at various Public / Civic spaces ? Can public spaces inspire people to give respect to even a garbage Bin as Hon.ble Garbage Bin Form and make them understand that its material elements are permanent beings in the creation.

		<p>The above problems are not today’s problems; these are coming from centuries and only scale matters now but they are not isolated problems but very much inter-connected to one another, where solution also need to be an integrated solution.</p> <p>Why architectural design creativity is not able to provide solutions at the very basic habitable space i.e. human congregation space right in the middle of a town and city. Can a public square create a human wisdom and expansion of human perception right in the middle of city ?. Can Architectural design of a public square inspires the citizens to give equal respect for Living and non-living things ?. Can a City square design inspire to tag a garbage bin as Hon.ble Garbage Bin Form in a middle of the city.</p> <p>Have an open dialogue with other experts of other disciplines to brain storm over your concept of Smart Public Square and incorporate feedback i.e.concerned to all people?.</p> <p>Take a pencil and sketch “ Smart Public Square “ for a city. Your Design need to Unleash the Unknown and link the users i.eCitizens with wisdom at thisSmart Public Square.</p>
6	Site	Take a Real site or Hypothetical site in a city of your choice with an Area around 4.0 Acres (16,160 sq.mt)
7	Main featuresTo be incorporated	Incorporate Archy. Features ,which goes beyond human mindsets, features to spark wisdom, peace, i.e Citizens responsibility, Citizens Roles and Duties, Unity ,integration and support , reflect these in physical forms as design features . Make provision for areas for commercial use for Restaurants, Art galleries, Open Air Theatre,Reserve a place for Public Protest March & Public demonstrations, other all uses that can comeup in a Public square. Show open parking , Show this Smart square as an Culmination point for local cultures. Show a Grand Peoples Path to replace Raj Marg(Kings way) to show Peoples Positive behavior as the foundation which need to be reflected. Ground coverage: maxi 30% , Total Builtup area shall not exceed= 10,000 sq.ft , main structure will be maximum G+1 with a viewing Tower of 30.0 mt maximum height with a SKY Restaurant on top of the tower.
8	Judgement Criteria	Design will be judged on the basis of Original ideas, Uniqueness, and practicability and should be able to inspire common masses to become “ Smart Citizens “.
9	Prize:	1st Prize:10,000 (ten Thousand) 2ns Prize: 7,500 (Seven Thousand and five hundred) , 3 rd Prize:5000/ (Five Thousand). Prizes will be awarded during BCOA Architectureism Fest on 18-20 th , May,2017.
10	Terms & Conditions	1) Team shall be 1-5 members maximum.

		<ol style="list-style-type: none"> 2) The Team will be required to submit Concept Plans, Sections, 3D Views and all relevant sketches that will explain their idea . 3) A 3D walkthrough may also be submitted in FLV/AVI formats only. File size should not exceed 50 MB. 4) Design Submission must be composed on a maximum of 3 three A1 panels (2mb each) in PDF.. 5) All 3 Winners will be given free registration to attend an International Workshop being conducted in the month of July,2017. By BCOA. 6) Non Indians also can send their Designs but prizes will be given as per conversation of Indian currency in Dollars. 7) The entry/entries should not have the name of the participating team/s at any place. 8) Entry needs to be sent by email with the unique identification code supplied to you by BCOA. Once registered, a code will be supplied. 9) The participating student must accompany the visual representation with a description of the concept design within 1000 words. 10) The synopsis must be in English. Any handwritten notes or regional dialect texts will be deemed invalid. 11) The synopsis must be typed in size 12 Times New Roman font and be double-spaced. 12) Any non-compliance will render the entry/ entries as disqualified. 13) Required any clarifications , pl. write to email brindavanarch.ka40@gmail.com.
11	Where to submit	With your code as subject line send it to email : brindavanarch.ka40@gmail.com
12	Last date for Submission:	10th , May,2017
13	Other Competitions&Programmescomingup:	<ol style="list-style-type: none"> 1) Global Students Architectural Design Essay Competition. 2) Global Student Design Competition for “ Smart Public Square for a City “ . Know more details at www.brindavancollegeofarchitecture.com 3) 2 day 16-17th ,June,2017 ,International Conference on “Architectural Design/ Forms and its relationship with human behavioral subjects of Sociology, Psychology, Philosophy, Medical Science, Biology and Science of Philosophy – as an input to Architecture +iSM- A way of Life.”

Architecture+iSM= Architectureism- a way of Living at bcoa.
